Separate paging is given to this Part in order that it may be filed as a separate compilation

PART III—SECTION 2

Notifications and Notices Issued by the Patent Office relating to Patents and Designs

THE PATENT OFFICE

Patents and Designs

Calcutta, the 17th August 1957

Application for Patents

The dates shown in crescent brackets are the dates claimed under Section 78A of the Act.

1st August 1957

- 61320. Council of Scientific and Industrial Research. Improvements in or relating to the preparation of active carbon.
- 61321. Societe Des Usines Chimiques Rhone-Poulenc. New phenthiazine derivatives and their preparation.
- 61322. Societe Des Usines Chimiques Rhone-Poulenc. Improvements in or relating to phenthiazine derivatives.
- 61323. Courtaulds Limited. Improvements relating to crimped regenerated cellulose fibres (1st August 1956).
- 61324. The Indian Oxygen & Acetylene Company Private Limited. Recovery of Krypton and Xenon. (3rd August 1956).
- 61325. North Western Gas Board. Improvements relating to the production of carbonised briquettes from coal.
- 61326. North Western Gas Board. Improvements relating to the manufacture of briquettes from coal.
- 61327. N. V. Philips' Gloeilampenfabrieken. Improvements in and or relating to methods of manufacturing semi-conductor devices. (10th August 1956).
- 61328. Ciba Limited. Manufacture of new benzimidazoles.
- 61329. Ciba Limited. Manufacture of new benzimidazoles.
- 61330. Ciba Limited. Manufacture of new benzimidazolyl-acetic acid derivatives.
- 61331. Ciba Limited. Manufacture of new nicotinic acid amides.
- 61332. Ciba Limited. A new sulphonamide and process for its manufacture.
- 61333. Ciba Limited. Process for the synthesis of steroids.
- 61334. G. A. Smith. Improvements in or relating to packing machines for tea and like articles.
- 61335. G. Kruk. Method and apparatus for the deposition below a water surface of bituminous substances such as asphalt or asphalt-containing mixtures for hydraulic engineering purposes.

2nd August 1957

- 61336. Chas. Pfizer & Co., Inc. Therapeutic composition and preparation thereof.
- 61337. Rohm & Haas Company. Non-Fibrous Product and Method of Making Same.

- 61338. United States Atomic Energy Commission. Process for separation of protactinium, thorium and uranium from neutron-irradiated thorium.
- 61339. Olin Mathieson Chemical Corporation. Pharmaceutical compounds.
- 61340. Union Carbide Corporation. Thermal insulation. (8th April 1957).
- 61341. Union Carbide Corporation. Thermally insulated bulk storage container. (9th April 1957).
- 61342. The Mond Nickel Company Limited. Improvements relating to the production of metal strip from metal powder. (3rd August 1956).
- 61343. Synthetic Mica Corporation. Method and apparatus for manufacturing synthetic mica.
- 61344. Union Carbide Corporation. Olefin polymerization. (27th December 1956).
- 61345. Burness, Corlett & Partners Limited. Improvements in and relating to stern frame arrangements in single screw ships.

3rd August 1957

- 61346. Union Carbide Corporation. Process for elimination of sulfur from metals.
- 61347. Union Carbide Corporation. Production of alloyed or deoxidized deposits by gas-shielded arc welding. (23rd April 1957).
- 61348. Imperial Chemical Industries Limited. Improvements in or relating to fused salt baths. (15th August 1956).
- 61349. Imperial Chemical Industries Limited. New dye-stuffs. (24th August 1956).

5th August 1957

- 61350. E. Steinmetz. Improved fused collars and cuffs of garments.
- 61351. E. Steinmetz. Improvements in fused or bonded collars, cuffs and bands of garments.
- 61352. C. M. V. Hobe. Method of and apparatus for the continuous treatment of elongated goods, more particularly textiles, in a vapour chamber.
- 61353. United Kingdom Atomic Energy Authority. Improvements in or relating to Heterogeneous Nuclear Reactors. (14th August 1956).
- 61354. The Indian Oxygen & Acetylene Company Private Limited. Process and apparatus for the low-temperature separation of air. (7th August 1956).
- 61355. The British Thomson-Houston Company Limited. Improvements in and relating to electrical control systems for winders and other conveyances moving in predetermined paths. (13th August 1956).
- 61356. The British Thomson-Houston Company Limited. Improvements in and relating to control systems for winders, hoists and the like. (13th August 1956).

61357. Unilever Limited. Improvements in or relating to cocoa-butter substitutes. (10th August 1956).
61358. Schmidt'sche Heissdampf-Gesellschaft Mit Beschränkter Haftung. U-Shaped return bend, especially for superheaters and the like, made of tubes arranged in distances and parallel to each other, possessing two tube shanks welded together at the front ends and closed by means of a welded-on cap.
61359. Kugelfischer Georg Schafer & Company. Hydraulically operated tools for assembling and disassembling the parts of press-fitted assemblies. 6th August 1957
61360. PECHINEY Compagnie de Produits Chimiques et Electrometallurgiques. Manufacture of manganese in the low Blast-furnace.
61361. PECHINEY Compagnie de Produits Chimiques et Electrometallurgiques. Process for making aluminium nitride.
61362. PECHINEY Compagnie de Produits Chimiques et Electrometallurgiques. Process for the manufacture of alumina enabling to use the low blast-furnace.
61363. Organico. Process for colouring superpolyamides.
61364. Imperial Chemical Industries Limited. New dyeing process. (21st August 1956).
61365. H. Hefti. Process for dehydrating viscous solutions of vegetable flours.
61366. H. Hefti. Improvements in the processing of flours.
61367. H. Hefti. Process and apparatus for decorticating seeds at high temperature.
61368. Metropolitan-Vickers Electrical Company Limited. Improvements relating to traction vehicles having axle-hung traction motors. (7th August 1956).
61369. Ciba Limited. Process for the dyeing of polyhydroxylated materials and solutions and dye-stuff preparations suitable therefor.
61370. Huttenwerk Oberhausen Aktiengesellschaft. Process for refining metals in a rotary drum furnace.
61371. Thoma Company G.m.b.H. Suction tube mounting in spinning machines.
61372. Standard Telephones and Cables Limited. Improvements in or relating to carrier wave modulators and demodulators. (8th November 1956).
61373. Standard Telephones And Cables Limited. Improvements in or relating to telephone transmitters. (9th November 1956).
61374. Standard Telephones And Cables Limited. Improvements in or relating to electric discharge tubes. (13th February 1957).
61375. E. I. Du Pont De Nemours And Company. Novel perfluorocarbon polymer compositions.
61376. Ciba Limited. New unsaturated aliphatic amino-diols and process for their manufacture.
61377. Ciba Limited. Manufacture of new nicotinic acid derivatives.
- by the numbers of specifications as shown in the following list.
- If required typed copies of the specification together with copies of drawings, if any, can be supplied by the Patent Office on payment of the necessary charges may be ascertained on application to the office.
- The dates shown in crescent brackets are the dates allowed under Section 78-A of the Act.
55757. Council of Scientific and Industrial Research. A process for the preparation of long-chain unsaturated ketones and 1- ω -ketodicarboxylic acids from the said ketones. Accepted on 3rd August 1957.
- Converting monocarboxylic acid into acid chloride, treating said chloride with tertiary amine, treating ketone dimer thus obtained with alcoholic potash to obtain ketone which is finally oxidised to ketodicarboxylic acid.*
56429. Godrej Soaps Private Ltd. An improved process for making washing bar soap. Accepted on 31st July 1957.
- Wherein a part of the water in kettle soap is replaced by neutral sodium silicate and the resulting mass converted into washing soap in conventional toilet soap machinery.*
56451. United States Steel Corporation. Improvements in continuously curing the resin coating of moving steel strip. Accepted on 1st August 1957.
- Progressively heating strip to a temperature between 500 and 800°F and quickly cooling thereafter.*
56469. The English Electric Company Limited. Improvements relating to dynamo-electric machines. (18th February 1955). Accepted on 1st August 1957.
- Cooling medium circulated by means of a blower in heat exchange relation with first cooling means then through ducts within the casing with a second cooling means.*
56474. Dwijendra Nath Chaudhuri. Improvements in or relating to stoppers. Accepted on 3rd August 1957.
- Consisting of an outer sleeve embracing the outside of bottle neck and integral therewith an inner tubular body engaging inside of the bottle neck, the tubular body being open at its upper end to receive a disc to cover the upper end.*
56488. Farbenfabriken Bayer Aktiengesellschaft. New stilbene compounds suitable for use as brightening agent and the production of these compounds. (16th February 1955). Accepted on 6th August 1957.
- 4 amino-4'-nitro (or 4'-acylamino) stilbene-2,2'-disulphonic acid is diazotised, the diazogroup is reduced and the product is condensed with a β -ketoburaldehyde acetal, the nitro group if present being reduced and substituted by acyl group.*
56497. United States Steel Corporation. Extensometer. Accepted on 6th August 1957.
- Comprising entry roll and exit roll over which strip passes, two pulse type tachometer generators are driven by entry roll and the other by exit roll, a pre-set counter at the output of one of said generator, an events per unit of time meter at the output of the other generator and means operable by said counter to start said meter counting at beginning of count on said counter and stopping the meter at the end of a count on said counter.*
56543. Ferbwerke Hoechst Aktiengesellschaft vormals Moister Lucius and Bruning. Unsaturated polycyclic sulfites and a process for their manufacture. (12th April 1955). Accepted on 3rd August 1957.
- 5:6 dihydro-product of diol is reacted with thionyl chloride.*
56565. Bartrev Limited. Improvements in and relating to the mixing of particulate solid material with liquid. (17th February 1955). Accepted on 2nd August 1957.
- The particles are caused to fall in a curtain at which the coating liquid is directed in the form of spray.*

Alteration of Date

60787. Ante-dated to 17th November 1955 under Section 5 of the Act.
60881. Ante-dated to 17th November 1955 under Section 5 of the Act.
60884. Ante-dated to 17th November 1955 under Section 5 of the Act.

Applications Accepted

Notice is hereby given that all persons interested in opposing the grant of patents on any one of the applications referred to below may at any time within four months of the date of this Gazette of India give notice to the Patent Office in the prescribed form No. 6 of the Indian Patents and Designs Rules, 1933 of such opposition.

A limited number of printed copies of the specifications in the following list will be available for sale from the Government of India Book Depot, 8, Hastings Street, Calcutta, in due course. The price of each specification is Rs. 2 (postage extra, if sent out of India). Requisition for the supply of printed specifications should be accompanied

56574. Spooner Food Machinery Engineering Company Limited. Improvements in or relating to the steaming of dough products. (23rd February 1955). Accepted on 3rd August 1957.
Steam is admitted in a steaming chamber and a baffle is provided above the path of the dough products.
56616. VEB Spinn-und Zwirnereimaschinenbau Karl-Marx-Stadt. Tract or guide channel with doubling device, and device for checking fibrous bands consisting of two or more single fibrous strands. Accepted on 6th August 1957.
Guide channel with doubling device and controlling device for the fibrous band comprising two or more single strands, control being effected by means of feelers.
56694. The British Petroleum Company Limited. Improvements relating to blends of diesters and complex esters suitable for use as lubricants. (4th March 1955). Accepted on 1st August 1957.
Comprising a liquid aliphatic diester of a saturated aliphatic dicarboxylic acid and a complex ester.
56841. A. Soennecken. Fountain pen. Accepted on 1st August 1957.
Nib being guided in longitudinal direction of the holder by means of co-operating means.
57077. Arcon (Proprietary) Limited. Improvements in and relating to portable prefabricated building structures. (29th April 1955). Accepted on 3rd August 1957.
A building structure of the three pin frame type made up of leg frames and roof frames of triangulated construction.
57463. The Singer Manufacturing Company. Securing machine throat plate with needle-threading aid. Accepted on 1st August 1957.
Along and a short grooves are provided one opposite side the other along the needle and an indicium for direction.
57651. Farbenfabriken Bayer Aktiengesellschaft. Process for the decomposition of titanium ore. (18th April 1956). Accepted on 1st August 1957.
Treating with one and half times the excess quantity of H_2SO_4 than that required stoichiometrically of 45 per cent—75 per cent concentration.
57682. R. Wucher. Improvements in and relating to apparatus for moulding plastic materials. Accepted on 1st August 1957.
Comprising a heated cylinder, a screw rotatable therein having a diffuser head, injection valve means at the forward end of the cylinder and means for effecting relative motion between the screw on the cylinder.
57695. G. H. Fletcher. Improvements in or relating to dynamo electric machines. (29th June 1955). Accepted on 6th August 1957.
Armature coils with conductors arranged one above the other each coil being subdivided into a plurality of sections, at least one section being extended beyond the back end to form a commutator connection.
57769. Elektrokemisk A/S. Improvements relating to the cleaning of gases from aluminium furnaces and to the recovery of fluorine therefrom. (22nd May 1956). Accepted on 3rd August 1957.
Washing gases with a fluorine absorbing washing liquid whose pH is less than 7.
57947. Kabushiki Kaisha Nagata Seisakusho. Water dressing machine for coal. Accepted on 1st August 1957.
Comprising a water tank having two compartments each having three dressing chambers wherein the width of the third chamber is smaller than those of other chambers.
57994. The Goodyear Tire & Rubber Company. Improvements in tire removing tool. Accepted on 1st August 1957.
Includes a clamp capable of gripping the wheel flange, a bead unseating assembly connected with the clamp, and a presser member.
57997. Chinoin Gyogyszer Es Vegyeszeti Termeker Gyara R. T. aluminium salts of substituted salicylic acids and the production thereof. Accepted on 6th August 1957.
Reacting p-amino salicylic acid or p-acylamido salicylic acid with aluminium hydroxide or alcoholate.
58019. Imperial Chemical Industries Limited. Arc welding. (4th August 1955). Accepted on 1st August 1957.
Joint to be welded is chilled by means of thin, ductile, fluid cooled metal chills shaped to make close contact with the surface.
58256. The Goodyear Tire & Rubber Company. Improvements in apparatus for stacking tile. Accepted on 1st August 1957.
Comprises a conveyor, a trough adjacent to but below the discharge end of the conveyor.
58286. Rohm & Haas Company. Preparation of strong self-supporting fibres filaments, yarns and films of thermoplastic copolymers. Accepted on 1st August 1957.
Passing an aqueous dispersion of a thermoplastic through an orifice into an acidic coagulating bath and fuse drying the shaped product.
58290. Guest, Keen & Nettlefolds (Midlands) Limited and Acton Bolt Limited. Improvements in rotary thread rolling apparatus. (26th September 1955). Accepted on 3rd August 1957.
Pressure pad means provided between the feed wheel and main gap between stationary segment and thread roller.
58320. Knapsack-Griesheim Aktiengesellschaft. Process for carrying out endothermic reactions at high temperatures. (6th January 1956). Accepted on 3rd August 1957.
Process wherein at least one molecular gas in the presence of which reaction is carried out, is thermally split into atoms is characterised in that the gas is caused to act outside the heating zone upon the other reactants, the heat liberated by the recombination of the atomic gas being utilised for the endothermic reaction and the mixture being chilled.
58344. Svenska Aktiebolaget Bromsregulator. Automatic slack adjuster for brakes. Accepted on 3rd August 1957.
Brake rod included in the brake regging and comprising a first non-rotatable part, a second non-rotatable part and an intermediate rotatable section.
58455. The Western States Machine Company. Control system for centrifugal machines installation. Accepted 5th August 1957.
Comprising a plurality of actuator to activate recycling means, timing means for starting timing means at predetermined timed sequence.
58473. Alice-M. Deprez. Method of producing a copal for technical purposes. Accepted on 1st August 1957.
Communicated copal is suspended in water, the suspension is heated, an acid phosphate is added, then a metal acetate is added, the mixture is filtered, residue is dissolved in an organic solvent, the solvent is removed and the foamy residue is heated until the foam disintegrate.
58783. Farbenfabriken Bayer Aktiengesellschaft. New thiophosphoric acid esters and their preparation. (18th July 1956). Accepted on 1st August 1957.
Reacting O, O-dimethyl-chlorothiophosphate with 3-nitro-4-chlorophenol or 3-nitro-4:6-dichloro phenol.
58822. M.E. Doumet. Improvements in or relating to cement. Accepted on 1st August 1957.
Mixing slurry prepared by wet process and powder by dry process to obtain mixture with water content of 10—35 per cent before feeding to kiln.
58901. K. Sundararajan. A replaceable automatic fuse and indicator. Accepted on 3rd August 1957.
Three pair of metallic jaws equally spaced along the circumference.

58908. Gerity-Michigan Corporation. Machines for burnishing articles. Accepted on 1st August 1957.

Tank with burnishing liquid and a plurality of radially extending rotary burnishing means projecting into tank.

58913. Fairbairn Lawson Combe Barbour Limited. Frame work for a machine. (13th December 1955). Accepted on 1st August 1957.

Comprising plurality of flat bearers with upper surface machined, rigid tie members or beams and a plurality of stands or shafts bearing supports on machined faces.

59054. Kollmar and Jourdan, Aktiengesellschaft. Improvements in or relating to elastic link straps. (28th September 1956). Accepted on 6th August 1957.

An elastic link strap comprising a plurality of parallel tubular members with at least one spring within each, and connecting members enclosing the ends of each tubular member.

59158. Tuboplast Societe Anonyme. Method and apparatus for securing a rigid end piece upon one end of a thermoplastic tubular element and tubular containers thus obtained. Accepted on 6th August 1957.

Introducing edges of tubular body in annular groove of end plate and heating the same to melt the thermoplastic body to form beaded edge therein on cooling.

59200. Standard Telephones and Cables Limited. Crossbar multswitch. Accepted on 1st August 1957.

Includes three sets of bars, bars in same set being parallel to one another while bars from two sets are perpendicular to one another.

59600. C. Fritz. Improvements in or relating to a cover-heated trough furnace. (21st February 1956). Accepted on 3rd August 1957.

Cover is offset on one side in relation to trough edge and covers only a part of surface of the melt.

59620. Imperial Chemical Industries Limited. Improvements in and relating to apparatus for contacting liquids with vapours. Accepted on 1st August 1957.

Wherein the plates or trays are each in two or more parts and the edges of the adjacent part plates are covered by a member to complete to liquid seal.

59631. H. Oetiker. Hose clamp. Accepted on 5th August 1957.

Hose clamp consists of two separate parts a metallic band with perforations and a bridge piece with a bulge to form a ring.

59679. L. C. Keogh. Improved road sweeper. (20th February 1956). Accepted on 1st August 1957.

Drive means connected to the wheels of a trailer type road sweeper rotates a brush.

59791. D. Napier & Son Limited. Hollow blades for turbines and the like. (14th March 1956). Accepted on 1st August 1957.

Hollow blade with aeropil zone, platform zone and root zone all formed from single piece of metal sheet or tube.

59950. Ricardo & Co., Engineers (1927) Limited. Internal combustion engines of the liquid-fuel injection compression, ignition type. (1st June 1956). [Addition to No. 54873]. Accepted on 1st August 1957.

Combustion pocket of circular cross section and narrow mouth in piston; fuel deflector in the pocket; fuel injection device in cylinder head with axis coincident with axes of cylinder and the pocket; valves in cylinder head with centres on diameter of cylinder bore or line lying parallel to and near the diameter.

59951. D. Napier & Son Limited. Control systems for gas turbine power units for aircraft. (13th April 1956). Accepted on 5th August 1957.

Variable datum speed sensitive device is controlled by the single control lever and trains the scheduled fuel supply.

60203. The Metal Box Company of India Limited. Improvements in or relating to pilferproof caps for bottles and like containers. Accepted on 3rd August 1957.

Lower ring portion of the cap is provided with one or more notches or slits.

60257. Coal Industry (Patents) Limited. Improvements in and relating to cover glasses for electric lamps. (27th April 1956). Accepted on 1st August 1957.

Glass comprising clear portion and frosted surface or translucent portion extending over an area such that filament of electric bulb behind cover glass cannot be viewed through clear portion.

60399. Strachan & Henshaw, Limited. Improvements in or relating to devices for moving rail wagons or the like. Accepted on 2nd August 1957.

Power operated trolley provided with a member movable into and out of the path or the railwagon which is moved.

60400. Dowty Hydraulic Units Limited. Improvements relating to buffers for railway vehicles. Accepted on 2nd August 1957.

Comprising a hydraulic cylinder having orifice means opening into a reservoir for hydraulic fluid disposed externally of the cylinder wall.

60527. James Mackie & Sons Limited. Improvements relating to gill boxes. (17th May 1956). Accepted on 3rd August 1957.

Additional pusher mechanism acts on each successive faller to push it away from guides along the beginning of return path.

60787. The Singer Manufacturing Company. Sewing machine needle-clamp. [Divisional date 17th November 1955]. Accepted on 1st August 1957.

Comprising a clamping band encircling the slotted end of the needle bar and a needle clamping screw threaded within said band and extending into the slot.

60881. The Singer Manufacturing Company. Sewing machines stitch forming devices. [Divisional date 17th November 1955]. Accepted on 1st August 1957.

A curved loop-taken formed with an interior loop-seizing beak continuously rotatable about an upright axis, a thread case, a holder for the threaded case and a work feeding mechanism.

60884. The Singer Manufacturing Company. Thread retainer for ornamental stitch sewing machine. [Divisional date 17th November 1955]. Accepted on 1st August 1957.

Providing a thread retainer on the bottom of the throat plate adjacent to the aperture for engaging the bobbin thread.

Patents Sealed

54634. 55100. 55139. 55297. 55310. 55321. 55322. 55327. 55347. 55368. 55374. 55378. 55425. 55452. 55454. 55486. 55563. 55598. 55659. 55687. 55861. 55912. 55965. 56104. 56111. 56394. 56407. 56539. 56674. 56708. 56735. 56973. 57055. 57135. 57201. 57250. 57269. 57404. 57543. 57544. 57652. 57904. 57932. 58278. 58646. 58948. 59005.

Amendment Proceedings

(1)

Notice is hereby given under Section 17 of the Indian Patents and Designs Act, 1911, that Sanji Fukuda, of Japanese Nationality, of No. 25, Higashi-Horikawa-Cho, Kita-Ku, Osaka, Japan seek leave to amend the name of the Applicant in the application, specification and drawings in respect of Patent application No. 56163. Any person desirous of opposing the application for amendment should at any time within three months from the date of this Gazette, give notice of his intention to do so on the prescribed form (from 6 of the Indian Patents and Designs Rules, 1933) in the Patent Office, 214, Lower Circular Road, Calcutta 17. The proposed amendment may be seen free of charge at the Patent Office, or copies thereof may be obtained from the Patent Office, on payment of the usual charges.

(2)

Notice is hereby given under Section 17 of the Indian Patents and Designs Act, 1911, that Union Carbide and

Carbon Corporation now re-named Union Carbide Corporation, Manufacturers, of 30 East 42nd Street, New York, State of New York, United States of America, a corporation organized under the Laws of the State of New York, United States of America seek leave to amend the name of the Applicant in the application and specification in respect of Patent application No. 56597. Any person desirous of opposing the application for amendment should at any time within three months from the date of this Gazette, give notice of his intention to do so on the prescribed form (form 6 of the Indian Patents and Designs Rules, 1933) in the Patent Office, 214, Lower Circular Road, Calcutta 17. The proposed amendment may be seen free of charge at the Patent Office, or copies thereof may be obtained from the Patent Office, on payment of the usual charges.

(3)

Notice is hereby given under Section 17 of the Indian Patents and Designs Act, 1911, that Union Carbide and Carbon Corporation now re-named Union Carbide Corporation, Manufacturers, of 30 East 42nd Street, New York, State of New York, United States of America, a corporation organized under the Laws of the State of New York, United States of America seek leave to amend the name of the Applicant in the application, specification and drawing in respect of Patent application No. 57140. Any person desirous of opposing the application for amendment should at any time within three months from the date of this Gazette, give notice of his intention to do so on the prescribed form (form 6 of the Indian Patents and Designs Rules, 1933) in the Patent Office, 214, Lower Circular Road, Calcutta 17. The proposed amendment may be seen free of charge at the Patent Office, or copies thereof may be obtained from the Patent Office, on payment of the usual charges.

(4)

Notice is hereby given under Section 17 of the Indian Patents and Designs Act, 1911, that Union Carbide and Carbon Corporation now re-named Union Carbide Corporation, Manufacturers, of 30 East 42nd Street, New York, State of New York, United States of America, a corporation organized under the Laws of the State of New York, United States of America seek leave to amend the name of the Applicant in the application, specification and drawing in respect of Patent application No. 57294. Any person desirous of opposing the application for amendment should at any time within three months from the date of this Gazette, give notice of his intention to do so on the prescribed form (form 6 of the Indian Patents and Designs Rules, 1933) in the Patent Office, 214, Lower Circular Road, Calcutta 17. The proposed amendment may be seen free of charge at the Patent Office, or copies thereof may be obtained from the Patent Office, on payment of the usual charges.
